Summary

Computer Science undergraduate with strong foundations in **C++**, **Python**, **Data Structures & Algorithms**, and **Machine Learning**. Experienced in developing **AI-powered applications** and backend systems. Seeking a **Software Engineering or AI/ML Internship** to apply problem-solving and development skills.

Education

ALLIANCE COLLEGE OF ENGINEERING AND DESIGN, BENGALURU *Expected Graduation: 2027*
B.Tech in Computer Science and Engineering **CGPA: 8.9**

SDC INDP PU COLLEGE, KOLAR **2023**
Completed Pre-University, securing **88.83%** (State Board).

SRI DATTA SAI HIGH SCHOOL, KOLAR **2021**
Completed Secondary School, securing **92.96%** (State Board).

Skills

Languages: C++, Python, JavaScript, SQL.
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS.
Tools: Git, GitHub, VS Code, Linux, Android Studio, FastAPI, React, Node.js, Express.js.
AI / ML: Machine Learning, Generative AI, LLMs, RAG, Embeddings.

Projects

- **RazorRecon AI – Financial Reconciliation Platform** [GitHub]
  - **Built** an **AI-powered finance controller** for the **Razorpay Buildathon** performing **3-way reconciliation** of payments, settlements, and bank statements, achieving a **68.3% match rate** and **100% anomaly detection** on injected test cases.
  - **Developed** a **Pandas-based rule engine** with **6 exception categories** for unmatched transactions, duplicates, amount mismatches, and settlement delays.
  - **Integrated** a **Google Gemini Settlement Q&A chatbot** with data-grounded responses and **SQLite caching**, plus automated **3-sheet Excel reports** using openpyxl.
  - **Validated** the system with **70/70 pytest tests** covering reconciliation rules, APIs, edge cases, and report generation.

  Tech Stack: FastAPI, Pandas, SQLAlchemy, SQLite, Google Gemini API, openpyxl, pytest.
- **AI Resume Screening & Candidate Ranking System**
  - **Built** an **AI-powered resume screening and candidate ranking system** using **semantic similarity** with **sentence-transformer embeddings**, exposed through a **FastAPI** backend with a **React** frontend.
  - **Explored** an alternative **embeddings pipeline** using the **HuggingFace Inference API** for candidate-to-job matching.

  Tech Stack: FastAPI, React, sentence-transformers, HuggingFace Inference API, Python.
- **Phishing Detection & Prevention Chrome Extension** [GitHub]
  - **Built** a **deep learning-based phishing detection system** for URLs and emails, integrated with a Chrome extension for real-time threat detection.
  - **Developed** URL and email detection pipelines using **CNN (Conv1D), Self-Attention, BiLSTM, and Attention**.
  - **Implemented** a **FastAPI backend** for URL/email prediction and connected it to the Chrome extension for automatic page checking and user alerts.

  Tech Stack: Python, TensorFlow/Keras, FastAPI, CNN, BiLSTM, Attention, Self-Attention, Chrome Extension.

Internship

1M1B (One Million for One Billion) **Dec 2025 – Jan 2026**
AI for Sustainability Virtual Intern

- Gained practical experience in **Artificial Intelligence** and responsible technology aligned with the **UN Sustainable Development Goals (SDGs)**.
- Applied **Retrieval-Augmented Generation (RAG)** concepts to real-world, impact-driven problem statements.

Certifications

- **RAG and Agentic AI** – IBM (Certificate)
- **Introduction to Machine Learning** – NPTEL (**Elite + Silver, Top 1%**) | Jul–Sep 2025 (Certificate)
- **Machine Learning Specialization** – Stanford Online / DeepLearning.AI, Andrew Ng | Sep 2026 (Certificate)

Achievements

- **2nd Place** – Battle of Bytes Hackathon, Alliance University.
- **Participant** – HackFest 2.0 Global Hackathon, GDG Cloud New Delhi (2026).
- **Runner-Up** – Taluk-Level Kabaddi Competition.
